

An Investigation of Post-Exertion Malaise in women with Chronic Fatigue Syndrome

The University of Wisconsin is conducting a study aimed at understanding:

The mechanisms of post-exertion malaise in chronic fatigue syndrome (CFS)

We are asking for female CFS volunteers to participate in this study at the main campus of the University of Wisconsin, Madison, WI. The study will require three visits to the campus.

We will be analyzing blood and brain responses across the three-day study.

You will receive up to \$225.00 for your time and effort.

If you wish to participate, please leave your name, phone number and mention “**Post-Exertion Malaise Study**” at

608-262-2457
